I assess the article sent to me for reviewing in the following way (please mark the correct answer by entering YES or NO in the appropriate space):

The article presents an interdisciplinary and innovative presentation in assumptions and analyses:

The article plainly and clearly defines the research target

Research strategy and the assumed method are adequate to the set research target

The presented analyses and conclusions are correct

The article is characterized by careful systematization of knowledge

The references are new, up-to-date and well grounded

The article is organized logically and easy to follow

The language used is correct, academic, without unnecessary jargon

The volume of the article is justified

Reviewer's Conclusion (Mark the final conclusion by writing YES in the appropriate space) :
